Pre and Post Workout Nutrition

Pre-Workout Meal

- Immediately before workout
- Moderate-Glycemic Carbs
- Protein-Caffeine, Creatine & EAA's (essential amino acids)

Post- Workout Meal

- Immediately after workout
- High-glycemic Carbs-Protein (high quality and quick digestion)

Whey isolate is best choice-Creatine and EAA's

Example: Pre-work- chicken, broc., sweet potato 1-2hrs before training.

Pre- workout drink w/ Caffeine, Creatine & EAA's (essential amino acids) 30min before training.

Post Workout- ½ to 1 scoop protein powder + 2tsp of sugar

Recovery_ Recovery starts before the end of the workout

Good nutrition during training enhances recovery after training.

Prevents breakdown of muscle.

Enhances protein synthesis
